WORK EXPERIENCE

Spladap

September 2014 — Present

Senior Software Developer

- **Spladap Training System:** Built baseball hitting training platform with small remote team consisting of scrum master and one other developer. We used pair programming, daily stand-ups, and an iterative release cycle. Spladap trainers use the system to create customized plans using instructional videos and drills based on video analysis of their hitting. J2EE, Java, Swing, JPA/Hibernate, JQuery, AngularJS, Bootstrap, GIT, Maven, JS, AJAX.
- **Video Etch:** Led design and coding of iOS mobile app for hitters to examine videos of their swing.
- **Video Annotator:** Designed and built tools for trainers to annotate and compare videos using various analytical tools. Created a Javascript and OS X versions of the tool. Swift, XCode

Clinaero, Inc.

February 2006 — March, 2017

Senior Software Developer

- **CMS:** Designed, built, and extended J2EE Web Based Content Management System to allow several content writers, editors, and managers to create, maintain, and approve content for use on eMedTV website and for licensing to third parties.
- **Transitioning from Co-Location to Cloud Based Servers:** Built a java based conductor to build new batches of cloud based servers each night using Amazon's AWS API. EC2, Route 53 DNS, Elastic Load Balancers, and Amazon RDS.
- **Advertisement Delivery:** Designed and built system for advertisement delivery to match approved website content with relevant ads based on rules and ad topics for high traffic site. Designed and implemented SEO to maximize web traffic and ad revenue.

Keris, Inc.

February, 2002 — February, 2006

Senior Software Developer, Seattle, WA

- **A2All Novartis Study:** Developed clinical trial system for patients and clinicians to guide patients through a clinical trial information and adaptive questionnaires. J2EE based backend with a web based and C#.net Windows client to enter patient demographics.
- **Cooper Institute Training Application:** Developed C#.net Windows based clients for tablet PCs and web based front ends for a system to track training using XML based adaptable questionnaires and a J2EE backend.

X10

September, 2001 — Feb.,2002

Software Developer, Seattle, WA

- **Consumer Electronics Software:** Developed Windows based applications in C++ using Visual Studio for use with consumer electronics including cameras, motion sensors, and camera switchers. Worked extensively and deeply with Windows API, ATL, STL, DirectX, ActiveX, Printing, and image processing.

VitalLink

September, 1998 — June, 2001

Director of Software Development, Seattle, WA

- **Multimedia Education:** Designed, documented, and developed software for structured multimedia presentations for patient education with video and animation. Created multi-user, extensible authoring and media-management system.

Depository Trust Company

May, 1997 — September, 1998

Software Developer, New York, NY

- **Financial Software:** Developed Windows client software using Delphi for large firms batch processing.

Bachelors: Math/Computer Science

Wesleyan University, Middletown, CT

Secondary Teaching Certificate

University of Hartford, West Hartford, CT
